**K: Passage: Choose the best answer( 4 points )**

Chess must be of oldest games in the world. An Arab traveler in India in the year 900 wrote that it had been played a long time before. Chess was probably invented in India, and it has been played everywhere from Japan to Europe since 1400. The name "chess" is interesting. When one player is attacking the other's king, he says, in English, "check". When the king has been caught and cannot move anywhere, he says "checkmate". These words come from Persian. "Shah mate" means "the king is dead". That is, when the game is over and one player has won.

Such an old game has changed very slowly. The rules have not always been the same as they are now. For example, at one time the queen could only move one square at a time. Now she is the strongest piece on the board. It would be interesting to know why this has happened. Chess takes time and thought, but it is a game for all kinds of people.
