Bacteria live in any area of the earth. They are not all bad; in fact you could not live without some bacteria!	14								

Viruses are among the smallest microbes on the earth, even smaller than bacteria. They are different from bacteria because they cannot live on their own. Viruses need to be inside a living cell to live and grow. There aren't many good things about viruses. They usually attack your body and make you sick!

40) Where can bacteria live?

41) How are viruses different from bacteria?

42) Bacteria have one cell. A) true b) false

43) Viruses can live in any place in the world. A) true b) false

writing ___/12 + listening ___/4 + speaking ___/4 = total score___/20
